

# ENTREPRENEURSHIP

IS FOR

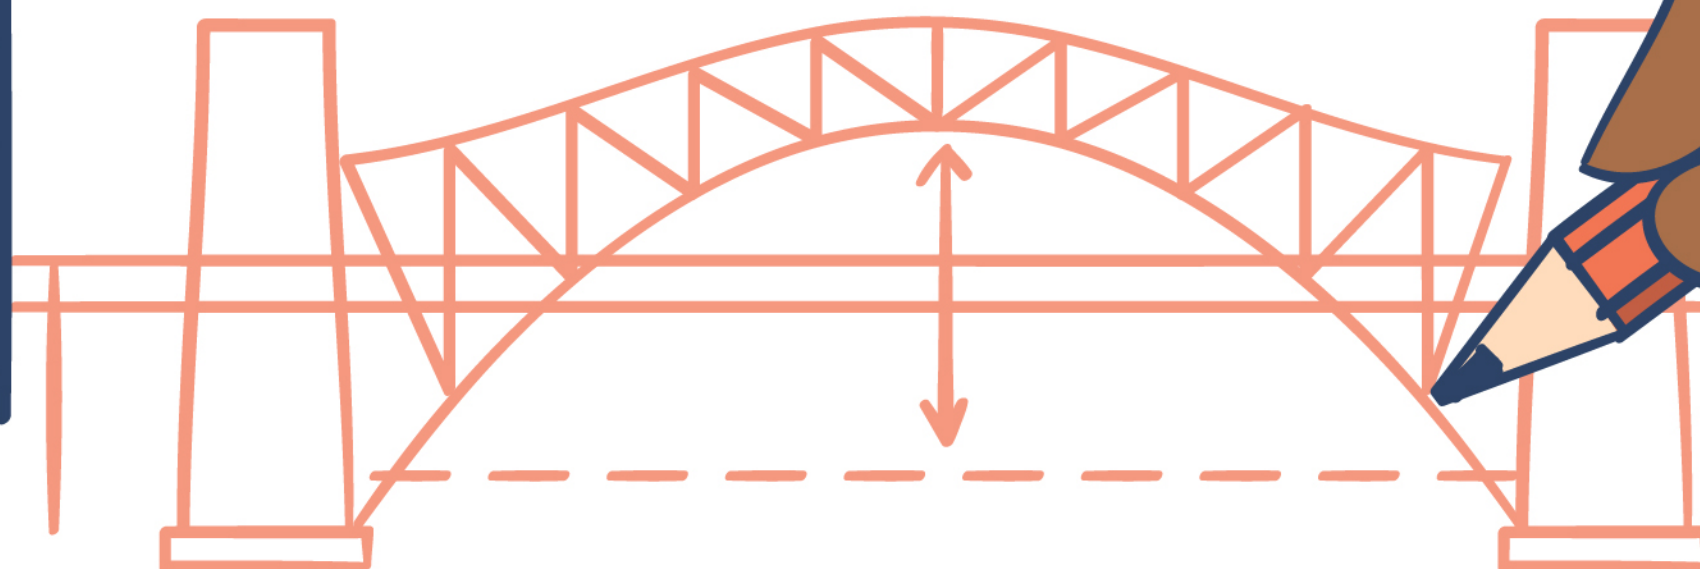

ANY  
ONE

who  
wants to turn  
an unsolved problem  
into a breakthrough success

ENTREPRENEURSHIP  
IS NOT A SPIRIT

It is a structured process  
for solving problems

Just like building a bridge, there are  
fundamental steps that **ANYONE** can  
learn, master and apply

# THE SEE, SOLVE, SCALE PROCESS

## 1 SEE Figure out what problem to solve

Observe and listen

Prevents the mistake of developing a solution in search of a problem

## 2 SOLVE Develop a Value Proposition

A small-scale solution to the problem through an iterative process

Envision your solution many years into the future and then invent backwards

## 3 SCALE Expand for long-term impact

Collaborate with people who bring complementary skills

Miss new opportunities

benefits of **SCARCE** resources

Overconfident

Fixed on particular outcome

Enables one to fail fast, fail cheap, and iterate quickly

burdens of **ABUNDANT** resources

“Freedom is found in the context of limitation.”  
- Monastic proverb

# 65%

of startups fail because of people tensions and team problems

## Tap your weak ties

Start-ups are more likely to succeed when teams are drawn from beyond your close contacts of family and friends.

# The team composition SWEET SPOT

Diversity in every way possible, including

- Background
- Skills
- Points of view
- Personality
- Race
- Gender

### Diverse teams

### Homogenous teams

### Inclusive teams
